

Hot Chili Edition

Küppersbusch
FÜR KÜCHEN MIT STIL

Red hot design!

Chili is an integral part of international cooking. And now Küppersbusch is paying homage to this fiery spice by featuring it in its kitchen designs: The new limited “Hot Chili” Edition is creating striking accents and will be offering eight products from the current Küppersbusch range in the ruby red design kit.

Black, high-gloss glass fronts with Hot Chili design kits usher in an exciting new kitchen atmosphere! Unmistakable and individual – a design that documents both creativity and decisiveness. Hot Chili is anything but boring!

A black kitchen with three built-in ovens. The ovens have red control panels and red horizontal accents. The middle oven is open, showing its interior. On the countertop, there are two red chili peppers and a stainless steel pot on a burner.

Discover your passion for
cooking with Küppersbusch

Nowadays, cooking involves a lot more than merely preparing meals. It is an expression of a modern, individual lifestyle. A lifestyle, in which good designs are just as important as a contemporary, healthy diet. In which high-tech counts just as much as quality and durability. With Küppersbusch you are choosing innovative technical solutions and award-winning product designs.

Two “Hot Chili” Edition products were awarded the coveted Red Dot Design Award: the built-in compact oven EEBK 6260.0 JX and the built-in steamer EDG 6260.0 J incl. design kit acc. no. R6000.

Compact versatility

With the design concept, Küppersbusch consistently showcases the possibilities of 5 different appliance types. Modern kitchen planning trends are provided with new combination possibilities of 45 cm high appliances for open-plan living.

Compact oven, steamer, coffee machine and LCD TV can be installed in a row (see previous page) or combined – as shown here – as a compact block of four.

The Hot Chili Edition is completed by the “classic” 60 cm high oven, a designer cooker hood in two widths and a warming drawer.

Premium+

**Built-in electric oven
EEB 6360.0 JX incl. design kit acc.
no. R6000**

Integrated safety – user-friendly operation with illuminated control knobs, 9 oven functions and programmable sensor touch electronic timer, ökothem® oven catalytic converter and removable oven door with full glass inner pane.
